

## Move IT to the cloud with free, familiar, easy-to-maintain Google Apps.

[www.google.com/appsatschool](http://www.google.com/appsatschool)

Thousands of schools, and millions of students, have already gone Google – moving to the cloud with Google Apps.

Google Apps helps deliver the advanced technology students need to communicate and collaborate without the cost and complexity of managing traditional hardware and software. With Google Apps, your school can provide integrated email, calendaring, online documents, and site sharing to all of your users – at no cost.

Whether you want to rethink your entire IT infrastructure or just add a layer of value to the systems you already use, Google Apps brings new potential and productivity to your campus while improving your students' technological skills, reducing IT costs, and ensuring the security of school and student data.

**No cost – no ads** Google Apps Education Edition is free – available at no charge for nonprofit educational institutions anywhere in world. It's also free of ads, so that staff, students, and faculty never see ads in any application – ever.

**Innovative technology** Provide students with the applications they already know how to use. Gmail (with built-in voice and video chat), Google Calendar, Google Docs, Google Sites, and Google Video enable your campus to communicate and collaborate easily and effectively. Use them all – or choose which products and features are made available to users at your school.

**Access from anywhere** Keep all of your users connected to their work and to each other – no matter where they are, when they work, or what platform or device they use.

**Security, privacy, and stability** Google takes data protection very seriously. We have achieved SAS 70 Type II certification and guarantee 99.9% uptime for Gmail, Google Docs (word processing, spreadsheets, and presentations), and Google Sites. Our global network of secure data centers are engineered for security, reliability, and redundancy, and are backed by some of the world's foremost security experts.

---

“The wealth of tools that Google Apps offers, and Google’s ability to provide a cost-effective robust service, made us all wish we had chosen to move this direction sooner.”

–Katie Rose, Program Manager for Enterprise Initiatives,  
Office of Information Technologies, Notre Dame University

---

**Technical support** Google provides phone and email customer support when you need it, and offers robust help centers, training videos, and discussion forums so that you can get ideas and best practices from other schools using Google Apps.

**Communications support** Google provides a range of marketing and training resources and materials to help people on your campus learn about – and get the most out of – the applications included in Google Apps.

---

## About Google Apps Education Edition

Google Apps Education Edition is a free suite of hosted communication and collaboration applications designed for schools and universities. Google Apps includes Gmail (webmail services), Google Calendar (shared calendaring), Google Docs (online document, spreadsheet, presentation, and form creation and sharing), Google Video (secure and private video sharing – 10GB free) and Google Sites (team website creation with videos, images, gadgets and documents integration), as well as administrative tools, customer support, and access to APIs to integrate Google Apps with existing IT systems.

---

*"Our students love the service; we're able to provide dramatically improved services without increasing costs."*

*—Wendy Woodward, Director of Technology Support Services, Northwestern University*

---

**Extensibility and integration** Easily integrate with existing systems like Blackboard, Sakai, Moodle, LDAP, Active Directory, and portals like Luminis using open standards and APIs that help with account provisioning and maintenance. Advanced tools like LDAP directory sync, OAuth, OpenID, and Single Sign-On, coupled with robust reporting and migration tools, simplify user administration and enable migrations from other systems like Lotus Notes, Microsoft Exchange, and Microsoft Outlook.

---

*"Not only did Apps have more benefits from a technological standpoint, but it also won out in the 'how much could this save us' discussion."*

*—Brian Bolt, Team Lead, Office for Information and Technology,  
Boise State University*

---

**Additional security and compliance solutions** Google provides educational institutions with a 66% discount on Google security and archiving services, powered by Postini, which block spam, viruses, phishing, malware, and more before they reach your network. With a hosted security solution that makes your existing email and web infrastructure more secure, compliant, and productive, Postini services deliver confidence to your campus, no matter where your users work, and with no software to install or hardware to maintain.
